SUMMARY

Senior Software Engineer with 4+ years of experience building scalable Java Spring Boot microservices, REST APIs, and cloud-native infrastructure on AWS and Kubernetes. Oracle-certified Java Developer with a track record of 3 promotions in 2.5 years, 500+ DSA problems solved, and measurable impact across security, performance, and CI/CD automation at enterprise scale.

TECHNICAL SKILLS

Languages: Java, JavaScript, Kotlin, SQL, HTML5, CSS3

Frameworks & Libraries: Spring Boot, Spring Framework, Spring Security, Hibernate, React.js, Android SDK

Cloud & DevOps: AWS, Kubernetes, Docker, GitHub Actions, Jenkins, Helm, CI/CD Pipelines

Databases & Messaging: MySQL, Redis, Firebase, Kafka

Tools & Platforms: Git, Maven, Gradle, Jira, Grafana, Selenium, TestNG

Concepts: Microservices, RESTful APIs, RBAC, OAuth2, Secrets Management

PROFESSIONAL EXPERIENCE

UKG (Ultimate Kronos Group) — Senior Software Engineer Nov 2024 – Present | Noida, UP, India

- Designed and maintained Java Spring Boot microservices and React.js frontend components for UKG Bryte, a large-scale enterprise HR platform serving payroll and workforce management workflows for thousands of enterprise users.
- Engineered REST API endpoints with full unit-test coverage and automation scripts, reducing manual QA effort and shortening release validation cycles.
- Scaled containerized microservices across multiple regions using Kubernetes orchestration and Helm-based deployments, ensuring high availability for global enterprise clients.
- Authored Helm charts and GitHub Actions CI/CD pipelines enabling zero-downtime production deployments; optimized complex MySQL transactions to improve data processing reliability.

Recruit CRM — Senior Associate Software Engineer Mar 2022 – Oct 2024 | Pune, Maharashtra, India

- Served as primary backend engineer on a SaaS recruiting platform, owning production APIs handling real-time requests across candidate, client, and workflow modules. Promoted 3 times in 2.5 years.
- Designed and built a RESTful test-data generation API from scratch using Spring Boot and Hibernate, eliminating manual data seeding.
- Hardened platform security by implementing Spring Security 6 with RBAC and token-based authentication, achieving measurable compliance improvement across all user-facing services.
- Eliminated credential exposure risk by integrating AWS Secrets Manager across multiple services, replacing all hardcoded secrets and passing subsequent security audits with zero findings.

PROJECTS

Byte Bazaar — Full-Stack E-Commerce Platform Java, Spring Boot, Angular.js, MySQL

- Built a complete electronics storefront with a Spring Boot backend and Angular.js frontend, including user authentication, product catalog, cart, and order management via REST APIs.

Yummy Plate — Real-Time Food Ordering Android App Java, Android SDK, Firebase, MySQL, OAuth2

- Built a real-time Android food ordering app with Firebase live order tracking, OAuth2 authentication, and a dual-database architecture (Firebase + MySQL) for responsiveness and data integrity.

EDUCATION

Galgotias University — B.Tech, Computer Science & Engineering Greater Noida, UP, India 2018 – 2022

CERTIFICATIONS & ACHIEVEMENTS

- Oracle Certified — Java Foundation Associate
- NPTEL Certification — Data Structures & Algorithms using Java
- 2nd Runner-Up, Inter-Campus Code War Hackathon — Built a Sanskrit learning app promoting cultural language preservation
- Hacktoberfest 2020 — Multiple accepted pull requests across open-source repositories
- 500+ problems solved on LeetCode and GeeksForGeeks across arrays, trees, graphs, and dynamic programming
